## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-15, 17, 18, 21-24, 31-39, 41, 45-72 and 87-93 are allowed over the Prior Art of record.
2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of independent claims 1, 39 and 87-92 is the inclusion of the specific limitations of a controller that is configured to direct the positioning of an articulated supporting arm with an articulated measuring supported by a plurality of compliant members of a positioning system, including an alignment detector/sensor that detects the alignment between the two arms (as recited in claim 1) or a datastore containing information that is accessible by the controller to resolve alignment of the two arms with respect to one another (as recited in claim 39), or wherein the controller directs positioning of the arms to reduce the relative degree of angular deflection between the arms (as recited in claim 87), wherein first and second encoders determine the alignment between the tow arms (as recited in claim 88), or provides assisted movement of the articulated measuring arm when an exerted force is applied to it (as recited in claim 89); or the articulated measuring arm is directed to resist movement when a force is applied (as recited in claim 90), or resist movement when a torque is applied to the articulated measuring arm (as recited in claim 91); wherein the controller directs characteristics from the group of speed, direction, and distance for positioning of the supporting arm based on the alignment between the two arms (as recited in claim 92). The Prior Art fails to include these specific limitations in relating to a positioning system having a controller or a datastore. The closest Prior Art

reference is US 4,676,002 to Slocum (see Figures 3 and 4 indicated within the previous Office Action) which teaches a posing system having many of the recited elements, but fails to disclose or teach the limitations recited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. Applicant is invited to review PTO form 892 accompanying this Office Action listing Prior Art relevant to the instant invention cited by the Examiner.
